Let's Build This Together is the first campaign of its kind in the 50-year history of A.D. Henderson University School and FAU High School. The school has embarked upon a capital campaign to rebuild our outdated facilities and replace them with state-of-the-art laboratories and classrooms embedded with 21st Century technology and resources. We can no longer build the education of tomorrow with the facilities of yesterday.

An investment in A.D. Henderson & FAU High School is an investment in public education in Florida and beyond. A new facility will allow us to expand upon our unique educational model, focused in STEM curricula and research, and continue on our mission to change education by replicating our program throughout the state and nation.

Phase one included a two-story, cutting-edge K-8 school and a multi-use athletic complex. Home to The Cane Institute for Advanced Technologies and our FAU High Research Program, activities within the STEM campus will be dedicated to solving some of our most complex societal challenges from cybersecurity and artificial intelligence, to alternative fuel vehicles and curing diseases. Equipped with the latest educational resources and technologies, this extraordinary STEM campus will be diverse in its impact, inspiring and developing students from preschool to Ph.D., providing discovery through high-tech and high-touch learning environments, housing our world-class curricula.
